

Free layout checklist

Ten checks before automatic running.

- ☐ 01 / Goal
My first automatic train movement is clearly defined.
- ☐ 02 / Access
Every track is accessible for maintenance and derailments.
- ☐ 03 / Train
The longest complete train is measured over couplings.
- ☐ 04 / Blocks
Boundaries and safe stops are marked on the plan.
- ☐ 05 / System
My plan matches the chosen K-track, C-track or two-rail system.
- ☐ 06 / Detection
Method, module and vehicles are compatible.
- ☐ 07 / Dimensions
Block and detection-section lengths are physically measured.
- ☐ 08 / Labels
Plan, wires and software use consistent names.
- ☐ 09 / Test
One train runs the test route slowly under supervision.
- ☐ 10 / Backup
The working file and test result are saved.
